

## EZ QuickSwab

The EZ QuickSwab is a laboratory-focused saliva collection tool designed to integrate seamlessly with existing lab equipment while cutting out sample-prep time and LC/MS cleaning policies. All while maintaining high levels of accuracy and efficiency.

### Key Features:

- **Pre-Soaked Buffer Solution:** Ensuring sample integrity during storage and transport, the buffer solution is also a preservative for the integrity of the sample and can be shipped and stored at room temperature without little to no damage to the recoverability of the sample.
- **Stop Cheating:** The buffer solution curbs cheating by allowing for a clean sample regardless of previous ingestibles used by the saliva donor.
- **Fast Collection:** Samples are collected in **90 seconds**, making it a practical choice for any environment.
- **Affordable Pricing:** Lab confirmation costs are approximately **\$50 per sample**, which includes shipping, positive result testing, MRO analysis and contact to the donor.
- **Lab Confirmation Only:** Exclusively used for confirmatory testing, ensuring reliable results and court defensibility.

## EZ Saliva I: A Comprehensive Rapid Oral Drug Testing Solution

The **EZ Saliva I** is a cutting-edge saliva-based drug testing device designed for rapid, accurate screening across various applications. Its ease of use and high accuracy make it an indispensable tool in modern drug detection.

### Key Features

#### 1. 7-28 Panel Rapid Screening:

- Capable of detecting a wide array of substances, including **Fentanyl (FEN)**, **THC Parent and/or Metabolite (marijuana)**, **Alcohol (ALC)**, and other drugs of abuse.
- Every EZ Saliva I comes with **Fentanyl** testing, we have the lowest cutoff levels to detect **FEN** and **THC**.

#### 2. Accuracy and Reliability:

- Strips range from **90-98% accurate** to laboratory-confirmed results, ensuring dependable outcomes.
- Allows for confident immediate decision-making.

#### 3. Pre-Soaked Buffer Solution:

- Ensuring sample integrity during storage and transport, the buffer solution is also a preservative for the integrity of the sample and can be shipped and stored at room temperature without little to no damage to the recoverability of the sample.
- Speeds up the collection time to just **90-Seconds**
- The buffer solution curbs cheating by allowing for a clean sample regardless of previous ingestibles used by the saliva donor.

### Advantages

- **Cost-Effective:** Reduces the need for third-party lab testing with rapid onsite screening for negative donors.
- **Versatile Detection:** Effectively identifies both common and emerging substances, adapting to evolving drug trends.

## EZ Saliva II: A Comprehensive Drug and Alcohol Testing Solution

The **EZ Saliva II** is a next-generation saliva-based testing device specifically designed for efficient, reliable, and legally defensible drug and alcohol detection. Ideal for law enforcement and workplace safety, the EZ Saliva II combines rapid results with laboratory-grade accuracy to meet modern testing needs.

---

### Key Features

#### 1. Comprehensive 14-28 Panel Screening:

- Detects a wide range of substances, including **Fentanyl (FEN)**, **THC**, **alcohol (ALC)**, and other drugs of abuse.
- Offers flexibility in panel configurations to cater to specific testing requirements.

#### 2. Pre-Soaked Buffer Solution:

- Ensures sample integrity during storage and transport the buffer solution is also a preservative for the integrity of the sample and can be shipped and stored at room temperature without damaging the integrity or recoverability of the sample.

- The buffer solution curbs cheating by allowing for a clean sample regardless of previous ingestibles used by the saliva donor.

#### 3. Split-Sample for Lab Confirmation:

- The split-sample design allows immediate screening and subsequent lab confirmation, providing legally admissible results.

#### 4. Rapid and Efficient Testing:

- Sample collection takes just **90 seconds**, and results are available within as little to **5 minutes**.

- Non-invasive and easy to administer, making it ideal for time-sensitive applications.

## 5. Tailored for Law Enforcement:

- Marketed as "Law Enforcement's Best Friend," the EZ Saliva II is specifically designed to assist officers with on-site testing for roadside drug and alcohol detection, reasonable suspicion testing, post accident testing, and more.
- Compact, affordable, and portable, it's an essential tool for maintaining public safety.

---

### Advantages

- **High Accuracy:** Offers **90+% accuracy** for preliminary results, comparable to laboratory standards, reducing false positives and negatives.
- **Durability:** Shelf life of 18 months
- **Cost-Effective:** Eliminates the need for standalone breathalyzers or additional tools by integrating drug and alcohol testing into one device.
- **Compliance:** CLIA, CAP, COLA, and ISO 17025 accreditation standards for lab testing available

### Applications

- **Law Enforcement:** Facilitates roadside drug and alcohol testing for DUI checks or field sobriety tests, Coroner testing, post-accident testing, and more.
- **Workplace Safety:** Enhances employer capabilities for maintaining drug-free environments, protecting employee safety and productivity.
- **Healthcare and Rehabilitation:** Supports substance use monitoring in clinical and rehabilitation settings with an accurate depiction of current/recent drugs active in the patient's system.

---

The EZ Saliva II combines speed, accuracy, and versatility in a single, user-friendly package, making it a trusted choice for safety-sensitive environments.
